

# Blade Runner

The new Bowling Green Iron designed and built by **POWEROLL**

**The Blade Runner has been designed to smooth the playing surface without increasing compaction. Bowlers will love the finish the Blade Runner provides.**

*Tom, greenkeeper at Swindon Supermarine Bowling Club reports;  
'The improvement to the green has exceeded all expectations. People used to moan about our green, now we're just given compliments.'*

In common to all Poweroll products, the effectiveness of the machine with operator comfort and convenience is given the highest priority. Also effective for the removal of frost heave.

## Features:

- A wider base than most irons to provide a very stable platform when changing direction and negotiating slopes on and off the green.
- Large diameter rollers are utilised to reduce compaction by having increased ground contact. This assists a smooth driving action through reduced rolling resistance.
- The rubber mounted engine and hydraulic drive unit is fully contained in a tray to keep oil /fuel off the green.
- Conventional greens iron operator position of the driver sat sideways.
- Tiller steering with 2 handed control for precise control of direction.
- Very comfortable for the operator, with ergonomically placed handles, lever and foot control. Seat is adjustable for reach. Hand grips swivel for comfort.
- Optional transportation trolley available

## Specifications:

- Standard rolling width of 1m.
- Honda GX160 QX4 recoil start petrol engine.
- Fitted with an Eaton Model 7 hydrostat for smooth and quiet power delivery in both directions of travel.
- Driving roller 8.5" diameter.
- Twin drum smoothing head rollers are 4.5" diameter and have rounded edges to prevent creasing the ground.
- Convenient foot control for direction and speed.
- A pad-lockable engine cover, to prevent unauthorised use or unauthorised access to the engine.
- Final drive by belt (no oily chains near the grass).
- Speed restricted to 12 mph.
- Base size - 1,165mm long x 1,095mm wide.
- Net weight 230k.g.
