

# POWERROLL *Club*

*Club* is the most recent addition to the range. Designed to offer clubs the opportunity of owning a brand new wicket roller, but at a second hand roller price. So how do we do it? Simple! This is a no frills grass roller and we expect to produce many. High quality components are used throughout, many also used on the Powerroll 12, but there are fewer of them on this model thereby helping to reduce costs. Only 84" long and 42" wide, this roller is compact enough to fit into smaller sheds than most other heavy ride-on rollers. Despite its diminutive size however, remains

within the I.O.G. guidelines for the ground pressure it displaces. Driver comfort remains a high priority so it uses the same luxury padded seat as all other Powerroll rollers and steering control from the Powerroll 12. A worm steering box is utilized so the steering control always feels positive (not vague like rollers with open gear wheels). Other shared components with the Powerroll 12 including the rollers, front bogie assembly and bearings. Maximum weight is achieved by filling water ballast tanks built into the chassis and rollers. This roller is capable of producing a superb wicket; good enough for any standard of play. An ideal machine for rolling wickets or tennis courts. Tandem rollers are most welcome in part exchange against this brand new machine.

## *Features and specifications:*

- **Net weight: 740kg Gross weight 1,530 kg.**
- **Rolling width of 36 inches. Split front rollers.**
- **Only 84" long and 42" wide, this roller will fit into small storage units.**
